Southwire: New Overhead Conductor for Extreme Ice

Southwire, Carrollton, GA, USA, offers a new high-quality, high-strength, cost-effective overhead conductor with significant performance advantages. Designed to handle extreme ice loads (over 1" thick around the conductor), Max Ice™ overhead conductors sag less under heavy ice loads. This saves money, as support structures don't need to be as tall.

Max Ice is also rugged to save utilities on downtime and repair costs following storm events.

LS Cable wins southeast Asia submarine cable contract

LS Cable & System has won a contract to export submarine cables worth KRW 62 billion from Singapore PowerGrid (SPPG). This is the first time a Korean cabling maker will export extra-high-voltage (EHV) submarine cables to southeast Asia. LS Cable will connect a 1.5 km offshore section between Woodlands New Town in the northern part of Singapore with Johor Baharu in the southern part of Malaysia.

Comtran: Fire Rated Cables Achieve "Free Air Rating"

VITALink® 2 Hour Fire Rated Circuit Integrity cables from **Comtran Cable**, Attleboro, MA, USA, are the first to achieve the CI Free Air Rating.

According to Comtran, these VITALink cables are classified as both CI/CIC, meaning the same cable can be used with or without conduit, making the cables the most versatile circuit integrity cables on the market. They offer a conduit-free solution for riser and horizontal installations, meaning no fill restrictions.

VITALink 2 Hour Fire Rated Circuit Integrity cables save money, time, space and labor, and are also wet rated and sunlight resistant. No special tools, termination kits or training is required for installation (installs per **NEC** code). Comtran VITALink 2 Hour Fire Resistant CI/CIC cables will protect critical systems under the harshest conditions. These cables are vital in life safety applications in hospitals, high-

VITALink® 2 Hour Fire Resistant Cable

Break Free with VITALink® CI Free Air Cables!
Comtran's VITALink® 2 Hour Fire Rated Circuit Integrity cables are the first to achieve CI Free Air Rating!

Nexans: Solar energy at cable plant; NVC JV now 100% owned

As part of its contribution to energy transition, Nexans, headquartered in Paris, France, recently inaugurated a new 600 kW peak solar power system at its Liban Cables Naher Ibrahim industrial facility North of Beirut, Lebanon. This solar power

project will allow Liban Cables to reduce greenhouse gas emissions by 750 tons per year.

Also, further to an agreement between Nexans and Viscas shareholders, the NVC Joint Venture is now a 100% Nexans-owned company.
