VITALink® Products – The Most Comprehensive Portfolio in the Fire Safety Market

Attleboro, MA –Comtran and RSCC, part of Marmon Electrical, leading providers of circuit integrity products are leveraging the strength of the VITALink® brand by offering a merged portfolio of 300V and higher constructions to service the fire safety market. The combined VITALink® portfolio is now the most comprehensive UL 2196 approved fire safety product line available.

Joe Barry, Sector President, is pleased to announce this merger, “Drawing upon technical and materials science expertise allows VITALink® to fulfill previously unmet needs within the 2-hour fire resistive circuit integrity industry. From the low-voltage CI/CIC constructions, to the industry-first ethernet construction, to armored constructions for both low voltage and medium voltage power feeds, there is a VITALink® solution available to meet all critical circuit requirements. As the VITALink® brand continues to drive innovation in the fire safety market, this portfolio will lead the way in constructions that meet UL 2196.”

A new VITALink® brochure, featuring the entire portfolio, will be available in early 2020.
